Abstract. This document provides some minimal guidelines (and requirements) for writing a research paper. Issues related to the contents, originality, contributions, organization, bibliographic information, and writing style are briefly covered. Evaluation criteria and due dates for the research paper are also provided.

Keywords: Research Paper, Technical Writing, Science and Technology

I. INTRODUCTION

This document is a template. An electronic copy can be downloaded from the IJARCMT website. For questions on paper guidelines, please contact the Journal publications committee as indicated on the IJARCMT website. Information about final paper submission is available from the IJARCMT website.

You must conduct research on various facets of software engineering and write a research paper as one of the requirements for the graduate Science, Engineering, and Technology courses. The paper may present original work, discuss a novel approach, offer an overview and assessment of recent research in a particular field, or provide in-depth and taxonomic tutorial information. The paper must highlight key ideas and guiding principles and should make a genuine contribution to knowledge. If your paper is not original, it should still be educational by offering a novel viewpoint or a synthesis of the body of knowledge. The purpose of this paper is to give you some recommendations. However, you are urged to consult additional sources that help you create a professional technical report.

Verify that the format of your final paper follows this model before submitting it. Examine the title and author blocks, section headings, document margins, column width, column spacing, and other features in particular.

II. METHODS AND MATERIAL

Use this document as a template and type your text into it to easily adhere to the formatting specifications for conference papers.

A. Page Layout

The margins must be set as follows:

- Top = 1.7cm
- Bottom = 1.7cm
- Left = 1.7cm
- Right = 1.7cm

Your paper must be in two column format with a space of 1.27 cm between columns.

III. RESULTS AND DISCUSSION

All paragraphs must be indented. All paragraphs must be justified, i.e. both left justified and right-justified.

A. Text Font of Entire Document

The entire document should be in Times New Roman or Times font. Type 3 fonts must not be used. Other font types may be used if needed for special purposes.

Recommended font sizes are shown in Table 1.

B. Title and Author Details

Title must be in 12 pt Times New Roman font. Author name must be in 11 pt Regular font. Author affiliation must be in 10 pt Italic. Email address must be in 9 pt Courier Regular font.

TABLE I
FONT SIZES FOR PAPERS

Font Size	I. Appearance (in Time New Roman or Times)		
	Regular	Bold	Italic
8	table caption (in Small Caps), figure caption, reference item		reference item (partial)
9	author email address (in Courier), cell in a table	abstract body	abstract heading (also in Bold)

11	level-1 heading (in Small Caps), paragraph		level-2 heading, level-3 heading, author affiliation
12	author name		
18	title		

C. Section Headings

No more than 3 levels of headings should be used. All headings must be in 10pt font. Every word in a heading must be capitalized except for short minor words as listed in Section III-B.

1) Level-1 Heading: A level-1 heading must be in Small Caps, cantered and numbered using uppercase Roman numerals. For example, see heading “III. Page Style” of this document. The two level-1 headings, which must not be numbered, are “Acknowledgment” and “References”.

2) Level-2 Heading: A level-2 heading must be in Italic, left-justified and numbered using an uppercase alphabetic letter followed by a period. For example, see heading “C. Section Headings” above.

3) Level-3 Heading: A level-3 heading must be indented, in Italic and numbered with an Arabic numeral followed by a right parenthesis. The level-3 heading must end with a colon. The body of the level-3 section immediately follows the level-3 heading in the same paragraph. For example, this paragraph begins with a level-3 heading.

D. Figures and Tables

Place figures and tables at the places where they needed. All tables should be in Classic 1 format with borders to heading and subheading columns.

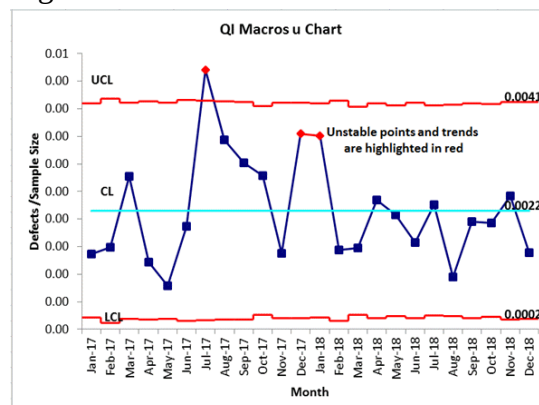

Figure 1. A sample line graph using colours, which contrast, well both on screen and on a black-and-white hardcopy

E. Page Numbers, Headers and Footers

Page numbers, headers and footers must not be used.

F. Links and Bookmarks

All hypertext links and section bookmarks will be removed from papers during the processing of papers for publication. If you need to refer to an Internet email address or URL in your paper, you must type out the address or URL fully in Regular font.

IV. CONCLUSION

Although a conclusion might summarise the paper's main ideas, avoid using the abstract as the conclusion. The importance of the work may be further discussed in the conclusion, and applications and extensions may be offered. The use of multiple figures or tables in the conclusion is strongly discouraged and should instead be referenced in the paper.

V. REFERENCES

The heading of the References section must not be numbered. All reference items must be in 10 pt font. Please use Regular style to distinguish different fields as shown in the References section.
